```
mqtt.onMessage(messageReceived);
```

```cpp
void messageReceived(String &topic, String &payload) {
  Serial.println("incoming: " + topic + " - " + payload);
  if (payload == "ON") {
    // turn the LED on
    digitalWrite(LED_BUILTIN, HIGH);
  } else if (payload == "OFF") {
    // turn the LED off
    digitalWrite(LED_BUILTIN, LOW);
  }
}
```
